Having trouble uploading artwork?
### Here are some ways to reduce file size:

Crop excess images that exceed the clipping mask. (Object>Image Crop)
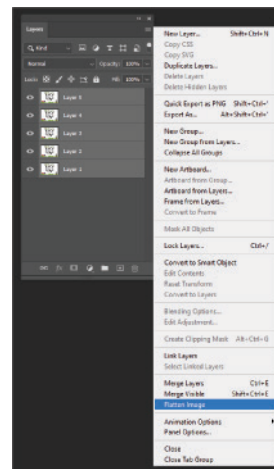

Remove excess vector points by simplifying the path. (Object>Path>Simplify)

Delete redundant or extra artwork outside of the artwork that is being printed. Only artwork within the print area should be provided in the file.

Flatten your artwork if you have multiple RASTER image layers.

Try using Adobe's compression tool:
https://www.adobe.com/acrobat/online/compress-pdf.html
